Education

Indian Institute of Information Technology, Kota

Aug 2023 - May 2027

B.Tech in Computer Science and Engineering

Vijay Jyoti Academy, Dewas

Apr 2021 - Mar 2023

12th Class in PCM, State Board

Result : 90.8%

Work Experience

Inditech Technology Services Pvt. Ltd.

Apr 2025 – Jan 2026

Product Development Intern

Remote

- Contributed to healthcare products by translating product requirements into **clear and usable application flows** across frontend, backend, and RESTful APIs.
- Improved existing product experiences by **30%** through database query optimization and backend refactoring, reducing latency and enabling smoother user interactions.
- Collaborated in **Agile** sprints with developers and stakeholders to iterate on product features, refine functionality, and deliver production-ready experiences.
- Resolved **critical production issues** and improved consistency and reliability across product modules through testing, monitoring, and Git-based CI workflows.

Coincent.ai

Apr 2024 – Jun 2024

AI/ML Intern

Remote

- Analyzed product requirements and experimented with **computer vision and NLP** approaches to identify and evaluate AI-driven solutions for real-world use cases.
- Designed and optimized an end-to-end **NLP** pipeline using **TensorFlow/Keras**, improving model performance and achieving **92%** accuracy through iterative experimentation and evaluation.
- Evaluated machine learning models using **Scikit-learn**, analyzing performance metrics and iterating on solutions to improve prediction efficiency and reliability.
- Improved image classification accuracy by **15%** by experimenting with **Vision Transformers (ViT)**, data augmentation, and model optimization techniques.

Projects

Grilli: Responsive Restaurant Experience | *HTML, CSS, JavaScript*

Live Project

- Designed and developed a **responsive restaurant website** with a polished visual layout across desktop, tablet, and mobile experiences.
- Created clear user flows for **menu discovery, table reservation, contact, and newsletter interactions**, focusing on intuitive navigation and accessibility.
- Implemented reusable UI sections including a **hero slider, menu cards, reservation form, and responsive navigation**, maintaining visual consistency across the product.

Crave-Corner: MERN Restaurant Platform | *React, TS, Node.js, Express, Stripe, MongoDB*

Live Project

- Built a responsive restaurant ordering platform with **React and TypeScript**, designing intuitive browsing, cart, and checkout flows for a seamless user experience.
- Improved product usability and reliability by reducing runtime errors by **30%** using **Zod** validation and structured state management across key user flows.
- Integrated **Stripe** payments, Cloudinary asset management, and **JWT authentication** to support secure and consistent ordering experiences across the platform.

Technical Skills

Design & Product: Figma, UI/UX Design, User Flows, Prototyping, Responsive Design

Languages: JavaScript, TypeScript, Python, SQL, C/C++

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend & Databases: Node.js, Django, REST APIs, GraphQL, MongoDB, MySQL, PostgreSQL

Development: Git, GitHub, Linux/Unix, CI/CD, API Testing, Debugging

AI/LLM: LLM Applications, AI Agents, Prompt Engineering, Gemini API

Achievements and Certifications

LeetCode Knight Badge: Attained a contest rating of **1800+**, ranking among top global percentiles.

VoyageHack 3.0 – TBO.COM: Participated in a national-level travel-tech hackathon, developing an AI-powered travel booking prototype using **MERN, APIs, and NLP** to simplify travel discovery and booking workflows.

GSSoC '25 Contributor: Selected as an Open-Source Contributor for the GirlScript Summer of Code.

AWS Solutions Architecture Virtual Experience: Completed the APAC Virtual Experience via Forage. [Link](#)

JPMorgan Chase Software Engineering: Completed the Forage Software Engineering Job Simulation. [Link](#)
